NUCLEAR INSTRUMENTS & METHODS IN PHYSICS RESEARCH Section A

Subject index

Accelerators, Beam Handling and Targets

Proceedings of the Fourth International Conference on Charged Particle Optics (Tsukuba, Japan, October 3–6, 1994)

Section I. Lithography and beam testing instruments

Miniature low voltage beam systems producable by combined lithographies, H.W.P. Koops, E. Munro, J. Rouse, J. Kretz, M. Rudolph, M. Weber and G. Dahm . . . 363 (1995) 1
Fifth-order aberration analysis of a combined electrostatic–magnetic focusing–deflection system, Y. Uno, H. Morita, N. Simazu and T. Hosokawa . . . 363 (1995) 10
Dynamic space charge effect correction in cell projection lithography, Y. Sohda, H. Satoh, Y. Someda, N. Saitou, H. Itoh and M. Sasaki . . . 363 (1995) 18
High precision electron optical system for absolute and CD-measurements on large substrates, J. Frosien, S. Lanio and H.P. Feuerbaum . . . 363 (1995) 25
Low-voltage probe forming columns for electrons, S. Beck, E. Plies and B. Schiebel . . . 363 (1995) 31
Pulsed electron beam generation via laser stimulation, M. Batinić, D. Begert and E. Kubalek . . . 363 (1995) 43
Accurate electron ray tracing for analysis of electron guns immersed in a magnetic-lens field, K. Saito and Y. Uno . . 363 (1995) 48
Aberrations of an electrostatic three-cylinder system used to simultaneously focus and deflect charged particles, I.C. Dowker, F.H. Read, N.J. Bowring and P. Hammond . . . 363 (1995) 54
High performance field-emission column for next generation E-Beam Tester, J. Frosien, C. Salvesen, R. Schmitt, K. Ueda and Y. Tokunaga . . . 363 (1995) 59
Zoom lens for a beam with finite emittance, E.V. Shpak . . . 363 (1995) 64
Anamorphotic quadrupole lens system for highly demagnified round spot, Y. Yamazaki and M. Miyoshi . . . 363 (1995) 67
Electron beam writing and direct processing system for nanolithography, H. Hiroshima, S. Okayama, M. Ogura, M. Komuro, H. Nakazawa, Y. Nakagawa, K. Ohi and K. Tanaka . . . 363 (1995) 73
On the research of a post-lens deflector for a submicrometer lithography system, Sheng Xia, Ding Shou-qian and Sun Jie . . . 363 (1995) 79

Section II. Accelerators and beam transport

Klystron simulation and design using the Field Charge Interaction (FCI) code, T. Shintake . . . 363 (1995) 83
The moment approach to high-order accelerator beam optics, W.P. Lysenko . . . 363 (1995) 90
Modern map methods for charged particle optics, M. Berz . . . 363 (1995) 100
Application to the SPIRAL project at GANIL of a new kind of large acceptance mass separator, B. Bru, A. Chabert and Ch. Ricaud . . . 363 (1995) 105
Optical design of beam lines at the KEK-PS new experimental hall, K.H. Tanaka, M. Ieiri, H. Noumi, M. Minakawa, Y. Yamanoi, Y. Kato, H. Ishii, Y. Suzuki and M. Takasaki . . . 363 (1995) 114
Defocussing of charged particle beams transmitted through meshes, D.L. Williams, F.H. Read and N.J. Bowring . . . 363 (1995) 120
Accurate and fast computation of high order fringe-field maps via symplectic scaling, G.H. Hoffstätter and M. Berz . . 363 (1995) 124
Uniform target irradiation by circular beam sweeping, Y.K. Batygin, V.V. Kushin, and S.V. Plotnikov . . . 363 (1995) 128
Microprobe systems with amplified deflection, S.Ya. Yavor . . . 363 (1995) 131
An electrostatic LEBT for a low-emittance injector: transport and focusing of a high-brightness H^- beam from a magnetron ion source, S.K. Guharay and M. Reiser . . . 363 (1995) 135
Beamlines without midplane symmetry for neutron and proton cancer therapy, W. Wan and M. Berz . . . 363 (1995) 142
On the wake fields reaction force which acts on electrons in an accelerator cavity, H. Kawaguchi and T. Honma . . . 363 (1995) 145
Measurement of input beam emittance to obtain MeV, mA-class heavy ion beams in a VERFQ linac, K. Tokiguchi, K. Amemiya, J. Ito, T. Sato, S. Yamada, Y. Hirao and N. Tokuda . . . 363 (1995) 153
Can we get a smaller emittance in a DBA lattice with bypasses?, L. Chen . . . 363 (1995) 159
Neutrino optics, D.C. Carey . . . 363 (1995) 162
Application of Lie-algebraic maps to the orbit dynamics of cyclotrons, W.G. Davies . . . 363 (1995) 173

0168-9002/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

Section III. Simulation

Computation of electrostatic lenses and multipoles by the first order finite element method, B. Lencová 363 (1995) 190
Accurate calculation of geometric aberrations in electrostatic lenses, G. Martínez and M. Sancho 363 (1995) 198
Computer assistance for the pre-design of optical instruments, M.A.J. van der Stam and P. Kruit 363 (1995) 205
LIONS: a new set of Fortran90 codes for the SPIRAL project at GANIL, P. Bertrand 363 (1995) 211

Section IV. Microscopes and energy analyzers

The quicksands between wave and geometrical charged particle optics, P.W. Hawkes 363 (1995) 215
Coulomb interactions in microfocussed electron and ion beams, P. Kruit, L.J. Vijgen and J. Xinrong 363 (1995) 220
A study of miniaturized electrostatic octupole deflectors, Z. Liu and J. Ximen 363 (1995) 225
Interferometric measurement of charged particle spectra (Fourier-spectroscopy), F. Hasselbach, A. Schäfer and H. Wachendorfer 363 (1995) 232
The development of a new field emission source applying electrohydrodynamics of liquid metal, K. Hata, T. Yasuda, Y. Saito and A. Ohshita 363 (1995) 239
Theory of cathode lenses for probe beams, A. Takaoka 363 (1995) 243
Reduction of energy non-linearity of hemispherical deflection analyzers when used with multidetectors, S.C. Page and F.H. Read 363 (1995) 249
Aberration analysis of Wien filters and design of an electron energy-selective imaging system, X.D. Liu and T.T. Tang 363 (1995) 254
A semi-analytical aberration calculation method using polynomials and Lie algebra, M. Matsuya, M. Saito and S. Nakagawa 363 (1995) 261
Secondary electron detection in the scanning electron microscope, M. Balasubramanyam, E. Munro and J. Taylor . . . 363 (1995) 270
A beam separator of a close packed prism array for low energy electron microscopy, K. Tsuno, E. Munro and J. Rouse 363 (1995) 276
Electron gun with electron-beam-heated point cathode: numerical analysis of electron beam for cathode tip heating, R. Iiyoshi, S. Maruse and H. Takematsu 363 (1995) 284
Optimization of the operating condition of the accelerating tube for the high voltage electron microscope equipped with the field emission gun, C. Morita, T. Ohye and H. Shimoyama 363 (1995) 291
Algorithms for numerical computation of aberration coefficients with an arbitrary optic axis, A.S. Berdnikov and M.A.J. van der Stam 363 (1995) 295
Time-dependent perturbation formalism for calculating the aberrations of systems with large ray gradients, H. Rose and D. Preikszas 363 (1995) 301
Aberration correction in a low voltage SEM by a multipole corrector, J. Zach and M. Haider 363 (1995) 316
Study on magnetic focusing and deflection electron microbeam probe systems, T.-T. Tang 363 (1995) 326

Section V. CRT and image tubes

The role of electron beam in display devices, O. Konosu 363 (1995) 330
The relations between the field parameters and magnetic potential harmonic coefficients, Ding Shou-qian, Sheng xia and Sun Jie 363 (1995) 337
Development of an electron optics simulator to consider the 3-D magnetic deflection field in CRTs, H. Miyazawa, M. Koizumi, T. Mizuta, K. Oku, S. Shirai and I. Yoshimi 363 (1995) 341
Progress in HDTV camera tubes, M. Kurashige 363 (1995) 347
Some dynamic problems in streak image tubes theory, V.P. Degtyareva and M.A. Monastyrski 363 (1995) 354
Advances in electron optics for image tubes, Zhu Kezheng 363 (1995) 358
Development of a 18-mm-diameter all-electrostatic Super-HARP tube for HDTV. Investigation of its electron optics, T. Yamagishi, M. Nanba, Y. Takiguchi, M. Kubota, S. Okazaki, T. Kato, K. Tanioka, T. Hirai and Y. Takasaki 363 (1995) 362
Fuzzy optimization of an electron optical lens, L. Wei, T. Linsu and Y. Hui 363 (1995) 367
Calculation of aberration of electron gun in color picture tubes, L. Wei, T. Linsu and Y. Hui 363 (1995) 371
High-frequency asymptotics of MTF in image tubes, M.A. Monastyrski 363 (1995) 379
High resolution ceramic gun for projection CRT, T. Muchi, S. Tagami and T. Saito 363 (1995) 385
Beam spot shift in a dynamic astigmatism correction type (DQ-DAF) electron gun, Y. Ueda, M. Sukeno and H. Suzuki 363 (1995) 389

Section VI. Mass spectrometers and mass separators

On-line isotope separators for radioactive ion beam facilities, H. Wollnik 363 (1995) 393
Ion optics for Fourier transform ion cyclotron resonance mass spectrometry, A.G. Marshall and S. Guan 363 (1995) 397
Oversimplified, compact double focusing mass spectrometer geometries, D. Ioanoviciu 363 (1995) 406
Computer simulation of the quadrupole mass filter, M. Takebe and S. Kumashiro 363 (1995) 411
ISIOS: a program to calculate imperfect static charged particle optical systems, M.I. Yavor and A.S. Berdnikov 363 (1995) 416

The charged particle time-of-flight and space focusing in a two-dimensional electrostatic field, L.G. Glickman, Yu.V. Goloskokov and S.P. Karetskaya 363 (1995) 423
Ion optics of a time-of-flight mass spectrometer with electrostatic sector analyzers, T. Sakurai, H. Ito and T. Matsuo. . 363 (1995) 426
Three-dimensional simulation of charged particle beam trajectories in radio frequency electric field of a quadrupole mass spectrometer, K. Yoshinari, Y. Ose and F. Nakajima 363 (1995) 429
The methods of shuttle-sums and of shuttle-integrals in ion optics, A.D. Dymnikov 363 (1995) 435
A high-performance mass spectrometer for very small size, M. Ishihara, Y. Kammei and H. Matsuda 363 (1995) 440
Field distribution and electron optical properties of electrostatic conical slit lenses, M.I. Yavor and E.V. Strigova . . . 363 (1995) 445
Schemes for mass analyzers based on mirrors with two-plate electrodes, L.G. Glickman, Yu.V. Goloskokov and S.P. Karetskaya 363 (1995) 451
Elastic scattering induced peak tails in time-of-flight mass spectra, D. Ioanoviciu. 363 (1995) 454
The particle motion through the fringing field of a toroidal condenser in a third-order approximation, B. Hartmann and H. Wollnik 363 (1995) 458
Mathematical modelling of non-linear magnetic quadrupole systems for shaping ion beams of minimum spot size with a given beam current on target, A.D. Dymnikov, D.N. Jamieson and G.J.F. Legge 363 (1995) 463
Emittance measurement of mass-separated high-current ion beams, S. Ogata, T. Hisamune and S. Seki 363 (1995) 468
Ion optics of a high resolution multipassage mass spectrometer with electrostatic ion mirrors, T. Sakurai and M. Baril . 363 (1995) 473
Real time 2 dimensional detector for charged particle and soft X-ray images, M. Ishikawa, M. Ito, T. Endo and K. Oba 363 (1995) 477
Compact MCP assemblies for mass spectrometers, S. Matsuura, S. Umebayashi, Y. Kusuyama, Y. Natsume and K. Oba 363 (1995) 481
Mass spectrometers based on a cone-shaped acromatic prism, I.F. Spivak-Lavrov 363 (1995) 485
The use of conformally-invariant equations to describe tracks of charged particles, I.F. Spivak-Lavrov 363 (1995) 491
Cylindrical deflector focusing in two directions, T.Ya. Fishkova and L.P. Ovsyannikova. 363 (1995) 494

The plasma beat-wave acceleration experiment at Ecole Polytechnique, F. Amiranoff, J. Ardonceau, M. Bercher, D. Bernard, B. Cros, A. Debraine, J.M. Dieulot, J. Fusellier, F. Jacquet, J.M. Joly, M. Juillard, G. Matthieussent, P. Matricon, P. Miné, B. Montès, P. Mora, R. Morano, J. Morillo, F. Moulin, P. Poilleux, A.E. Specka and C. Stenz . 363 (1995) 497
Beam halo crystal extraction from the Tevatron during collider runs, E. Tsyganov and A. Taratin 363 (1995) 511
Conceptual design of a charged particle beam energy spectrometer utilizing transition radiation grating, X.Z. Qiu, X.J. Wang, K. Batchelor and I. Ben-Zvi 363 (1995) 520
Observation of target electron momentum effects in single-arm Møller polarimetry, M. Swartz, H.R. Band, F.J. Decker, P. Emma, M.J. Fero, R. Frey, R. King, A. Lath, T. Limberg, R. Prepost, P.C. Rowson, B.A. Schumm, M. Woods and M. Zolotorev. 363 (1995) 526

High Energy Physics Detectors

A study of the charge cluster characteristics and spatial resolution of a silicon microstrip detector, Y.-H. Chang, A.E. Chen, S.R. Hou and W.T. Lin 363 (1995) 538
Neutron and photon fluxes and shielding alternatives for the CMS detector at LHC, M. Huhtinen and P.A. Aarnio . . . 363 (1995) 545

High Energy Physics Systems

Study of a planar version of the BAYAN EM-calorimeter at high energies, A.V. Dolgopolov, A.V. Inyakin, V.I. Kryshkin, V.G. Lapshin, V.A. Lishin, S.A. Polovnikov, V.A. Polyakov, Yu.D. Prokoshkin, V.I. Rykalin, A.V. Shtannikov and A.L. Proskuryakov 363 (1995) 557

Instruments and Methods for Nuclear Spectroscopy

Calibration of the polarimeter POMME at proton energies between 1.05 and 2.4 GeV, N.E. Cheung, C.F. Perdrisat, J. Oh, K. Beard, V. Punjabi, J. Yonnet, R. Beurtey, M. Boivin, F. Plouin, E. Tomasi-Gustafsson, A. Boudard, R. Abegg, V. Ladygin, L. Penchev, N. Piskunov, I. Sitnik, E.A. Strokovsky, S. Belostotsky, V. Vikhrov, R. Frascaria, B. Johnson, R. Siebert, E. Warde, W.W. Jacobs, W.T.H. van Oers, C. Lippert and S. Nanda 363 (1995) 561
Scintillator based on SiO_2-aerogel, I.R. Boyko, M.A. Ignatenko, K. Esenak, L. Kuhta, J. Ruzička and V. Fainor 363 (1995) 568
Distribution of count numbers in positron lifetime spectra, J. Wawryszczuk, B. Jasińska, W. Górniak and T. Goworek. 363 (1995) 574
An approximate formula for the angular dependence of the residual defect in a silicon surface barrier detector, Yu.S. Tsyganov and A.N. Polyakov (*Letter to the Editor*) 363 (1995) 611
A wide range of electron energy determination with an imaging plate, M. Takebe, K. Abe, M. Souda, Y. Satoh and Y. Kondo (*Letter to the Editor*). 363 (1995) 614

Newton Physics

Development of a simple neutron irradiation facility with variable average energy using a light water moderated ^{241}Am/Be source, B. Mukherjee (*Letter to the Editor*) 363 (1995) 616

Electronics

A new sliding scale scheme for nuclear spectroscopic ADCs, A. Nour 363 (1995) 577

Numerical and Data Analysis

Neural network reconstruction of longitudinal beam phase space from the synchrotron radiation spectrum, J. Koga and T. Takeda 363 (1995) 580
A graphical analysis of decay curves measured by the Doppler-shift recoil distance method, A. Makishima, T. Ishii, M. Ogawa and M. Ishii 363 (1995) 591

Fission, Fusion, Spallation and Heavy Ions

Design and performance testing of a tritium calorimeter, M.I. Thornton, G. Vassallo, J. Miller and J.A. Mason 363 (1995) 598

Dosimetry, Space Radiation and Medical Applications

A new design scintillating fiber calorimeter to search for neutrino oscillations in massive underground detectors, M. Ambrosio, E. Angelillo, G.C. Barbarino, D. Campana, F. Guarino, E. Lamanna, A. Lauro, G. Mancarella and G. Osteria 363 (1995) 604

Synchrotron Radiation Research

TXRF with synchrotron radiation. Analysis of Ni on Si-wafer surfaces, P. Wobrauschek, P. Kregsamer, W. Ladisich, C. Streli, S. Pahlke, L. Fabry, S. Garbe, M. Haller, A. Knöchel and M. Radtke (*Letter to the Editor*) 363 (1995) 619

Letters to the Editor

An approximate formula for the angular dependence of the residual defect in a silicon surface barrier detector, Yu.S. Tsyganov and A.N. Polyakov 363 (1995) 611
A wide range of electron energy determination with an imaging plate, M. Takebe, K. Abe, M. Souda, Y. Satoh and Y. Kondo 363 (1995) 614
Development of a simple neutron irradiation facility with variable average energy using a light water moderated ^{241}Am/Be source, B. Mukherjee 363 (1995) 616
TXRF with synchrotron radiation. Analysis of Ni on Si-wafer surfaces, P. Wobrauschek, P. Kregsamer, W. Ladisich, C. Streli, S. Pahlke, L. Fabry, S. Garbe, M. Haller, A. Knöchel and M. Radtke 363 (1995) 619
